

Home in Reno, Nevada foothills has new Thermo-shield Exterior Wall Coat protection.

White Thermo-shield Exterior on the soffit and fascia, corner trim, trim around windows and doors, and railing around this porch. The blue custom color was matched from a chip (literally a chunk of wood with the paint on it) sent out by Reno area Thermo-shield dealer, Jim Johnson of Sunridge Painting.

Thermo-shield fills voids and cracks and prevents new ones from forming. The colors will stay bright and resist fade for years and years. Sound blocking performance and extreme fire resistance are both benefits of using Thermo-shield. Add the heat blocking power of an R-22 insulation. All these benefits for the cost of good paint.

Owners love the look of the Thermo-shield on their home so much they have ordered more for the garage out back.
