

**A friend saw my  
rocks stuck to the  
particle board I  
take to home  
shows to  
demonstrate the  
incredible  
adhesion of  
Thermo-shield**

**He took it to the max when he installed this solid, natural stone fireplace. Some of these stones weight 80-100 pounds each**

**This entire rock structure is held to the new plywood wall using Thermo-shield Stucco Finish!**

**The installer who has years of experience in stone and tile work says “you can’t pull a piece off if you wanted to, I LOVE IT!”**

**(I do not recommend this use YET, but will watch this project carefully and update when available)**
