

**This historic home turned office has received National Historic Registry status thanks to a exterior renovation achieved with Thermo-shield Exterior**

**All the exterior wood siding has been covered with Thermo-shield Exterior, tinted blue, as well as all soffit and fascia, and trim, which is white.**

**The pillars on the side porch, the plastered chimney and doors on carriage house are all renovated, beautified, and protected with Thermo-shield Exterior**

**Owner of this building also has Thermo-shield Interior in her own home. She loves the “cozy warm” way my home has become simply by painting my inside walls and ceilings!**
